

Top service. Competent. Professional. Europe-wide.

Maintenance of laboratory equipment is our business.
Our experience is your direct competitive advantage.

Range of services

- laboratory equipment of all types
- maintenance
- installation
- calibration
- repair
- call centre and help desk services
- international logistics

Service Features

- comprehensive all-round service – or partial service in individual areas,
- full service including administration – or on-call facility,
- full product range – or specific individual products,
- medium or long-term agreements – we are your flexible partners.

Service optimization

You need look no further in order to make your service products stand out in terms of both structure and capacity.

We're practically on-site anyway. Our service team and top level equipment are available for deployment at a moment's notice without start-up costs.

Europe-wide.

Service Outsourcing

In outsourcing geographical or individual product areas you can enhance your service provision with accuracy and flexibility.

Or you can concentrate fully on upstream core competencies while we meet all your clients' service requirements.

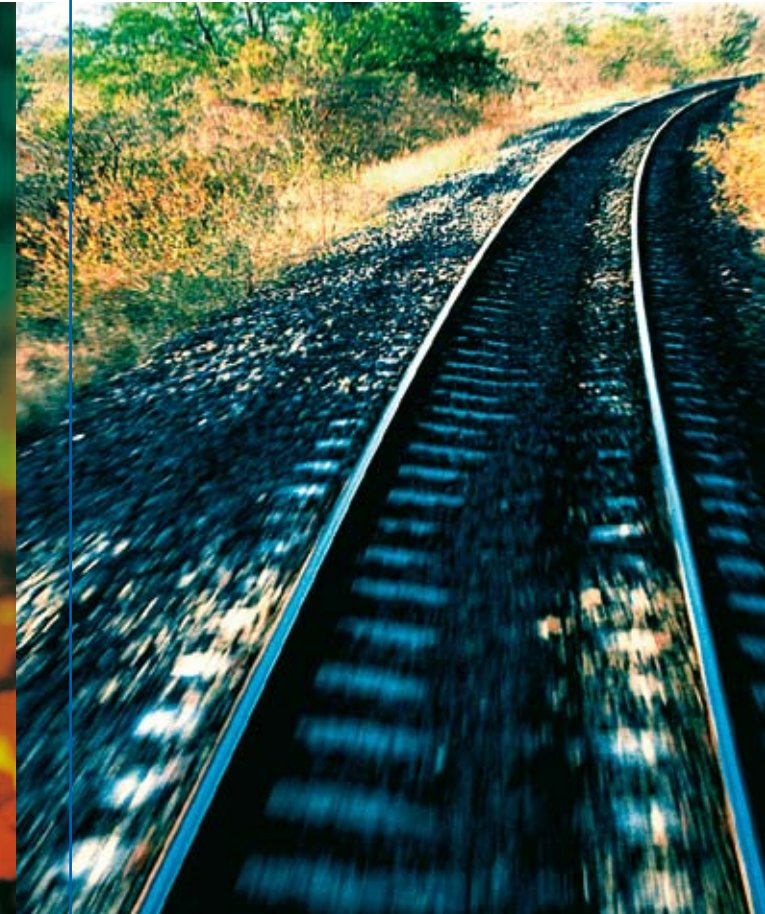

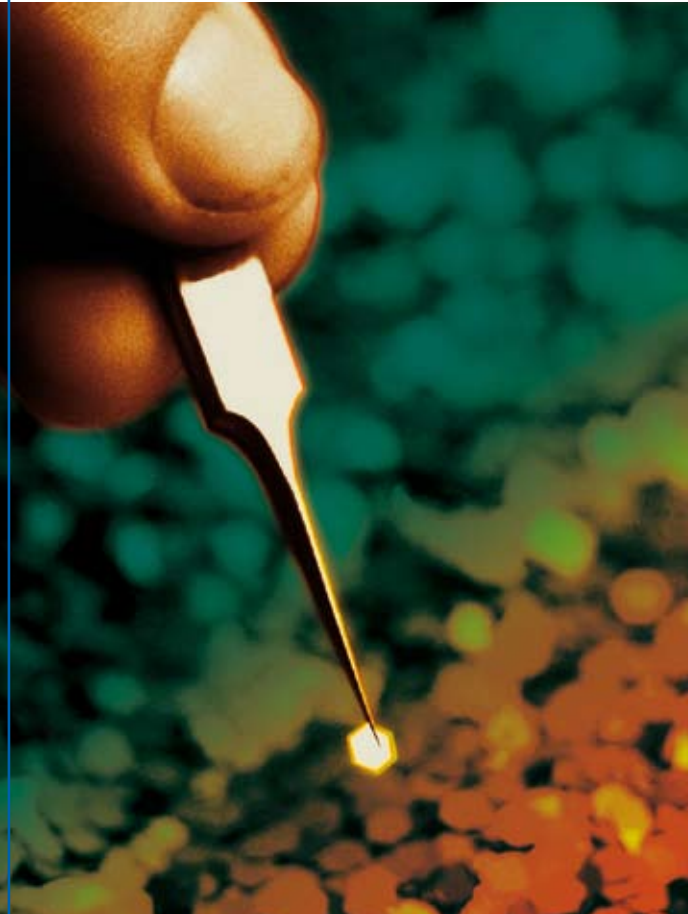

Europe-wide.

Opening up new markets

Any expansion into European and surrounding countries brings attendant aftersales obligations with it.

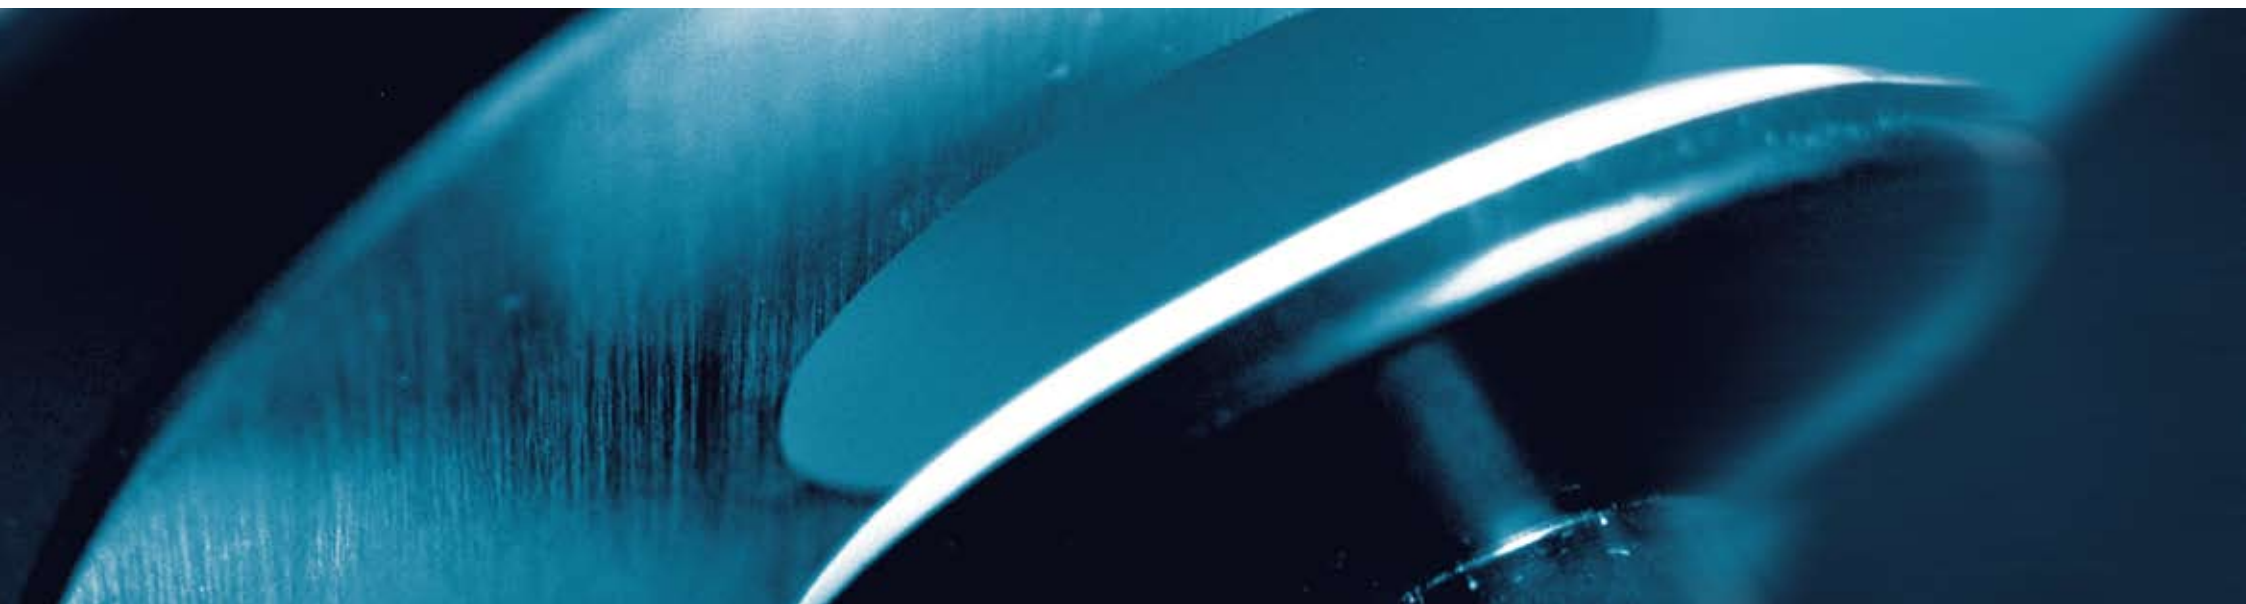

Our professional service network for high-calibre requirements can help you in opening up new market potential.

Europe-wide.

Service solutions in Europe and bordering countries
as a flexible enhancement to your value chain.

Fast. Competent. Correct. Fair.
